# Introduction To

LET'S LEARN 2GETHER AND SHARE TO OTHER

# Who We Are ??

- ▶ **OSAC(Open Source Ascol Circle)** is a tech based community of enthusiastic and energetic students also open learners from Amrit Science Campus.
- ▶ Established in **November 19 2011** With the motive of learning together and sharing other also organizing tech programs like tech talk, workshops and expos in regular intervals.

# Things We have done up to now

Starting....@#! (101)

## Hello World !

We started from the date 19th November 2011 and we came up to here now.

we begin from our first program :

**Pace towards Linux( 1st program of OSAC) -- 25th November 2011**

# Online OSAC Talk

We are Open Learners So we would like to learn technology regardless of the developing organization. We are open to learn any technology BUT we prefer Open Source Technology over closed source because Open Source provide more flexibility to learn.

On the same sprite we have fixed our 10th "OSAC TALK" with topics "Learn some windows commands" for **13th July 2012**. But the college get closed. So we decided to conduct it online. A facebook event [Online "OSAC TALK"](#) was created for 13th July 8:00pm to 9:00pm. At that time we members appear online and post some commands we know. The participants seems to be shearing enthusiastically. Nice and useful command were sheared there.

As the starting of "OSAC TALK" have the initiatives of running it regardless of any obstacles, the Online Talk act as our 1st attempt to overcome such obstacle.

**# Silent Talk !!**

# Silent Talk

We OSAC have conducted a unique type of talk "Silent Talk" as our 9th "OSAC TALK". There in Lab we setup projector, the presenter sits on the computer connected to projector, participants on their seats. The presenter have shown some steps about how to crack Linux Desktop password through the use of live boot media. The presenter have communicated with the participants with the help of **nano text editor** and the cracking steps are performed on terminal. It was new and nice experience for us.

celebrating software freedom day-2012

# ASCOL-CSIT Open eXP0 2012

*LETS LEARN 2GETHER AND SHARE TO OTHER*

**Date** : 15th Sep 2012

| 1:00pm  | 2:30pm  | Upload data to OpenStreetMap  |
| 2:30pm  | 3:00pm  | Discussion and wrap-up  |

# Document Freedom Day 2013

Following this trend of celebration, for the first time in Nepal, this year **Open knowledge foundation Nepal (OKFN)** and **OSAC** combinely involved in celebration, organizing a program. The programme was based on presentation, talk and demonstration on Open data, Open standards and Open data tools. GPA Nepal, Kamaladi was chosen as the venue for the event.

Firstly **Prakash Neupane (our Senior Brother)** presented on Document freedom and open Standard. Secondly **Bhim Doj Shrestha (Head central department of library and information science TU)** presented on Document Freedom and its Relevance in Libraries. In the similar manner Hempal Shrestha from FOSS Nepal discussed on interrelation of Open source with the Open documents and open standards. Last but not the least, Utshab Bhetuwal and Rajendra Sharma (members from OSAC) presented and demonstrated on Open data tools (LibreOffice and Bluefish Editor).
